

DETERMINE YOUR GOALS...

AND WE WILL ASSIST YOU WITH THE REST

- Site Development and Design
- Utilities Planning and Design
- Stormwater Management, Permitting and Design
- NPDES Municipal Stormwater Compliance
- Environmental Resource Permitting
- Well Design, Installation and Testing
- Water / Wastewater and Reuse Utility Design and Operations
- Ground and Elevated Water-Storage Facilities
- Water / Wastewater Facilities Planning
- Trenchless Technologies
- Sewer System Rehabilitation
- Water Supply Treatment
- Groundwater and Surface Water Modeling
- Roadway Design

Incorporated in the State of Florida in 1988, HSW Engineering is an integrated earth science and engineering firm providing proactive, innovative, and cost-effective solutions for Environmental, Water Resources and Civil / Land Development projects. HSW has distinguished itself as a leader in the environmental industry by adhering to its philosophy of strategic long-range management of environmental concerns. This successful philosophy revolves around a project organizational structure that always includes one of the firm's principals to maintain strict quality assurance, effective communication and senior leadership. HSW has successfully applied innovative strategies to technical and regulatory issues nationwide, resulting in substantial cost and time savings. This approach assures our clients of the best possible service and value and is a key reason that over 90% of our work comes from previous customers.

OUR TEAM

HSW's site development services incorporate the multi-disciplinary strengths of the firm to complete successful planning, design, and permitting projects. HSW offers an integrated team of engineering and environmental professionals along with hydrogeologists and water resource specialists to support each client's site development objectives while minimizing the environmental impacts to our natural resources.

In Florida, this integrated team approach allows HSW to provide our clients the comprehensive range of environmental due diligence, site layout and design, and permitting services required, under one company.

We have extensive experience in the following areas and more:

- Civil and Environmental Engineering
- Ecological and Hydrogeological Studies
- Water Resources Planning and Management
- Stormwater and Utilities Design
- Environmental Permitting, Auditing, and Reporting
- Construction Management, Support, and Oversight

KEY PROJECTS

HSW's expertise in water resources, environmental compliance and civil engineering provides the foundation for responsible site development. The following is a list of our personnel's project experience.

Little Harbor

Landscape Irrigation System Design

CF Industries

Environmental Resource Permitting, Wetland Restoration, Planning and Design

Hudson Lake Ranches

Engineering Design and Hydrologic Modeling for a 1,200-acre Residential Development

Hunter Estates

Groundwater Modeling to Support Environmental Resource Permit Application, including Wetland Impact Analysis

MHC

Engineering Design and Hydrologic Modeling to Correct Drainage Deficiencies

U.S. Army Corps of Engineers

A/E Contract for the Range and Training Land Program, at Various Locations in the U.S.

Lakeland Self Storage Facility

Land / Site Development and Permitting
