

RECYCLE

Recycle bins are located next to every printer for paper & cardboard recycling (each has a label of what the bin can / cannot contain).

The EPA has found that recycling causes 35% less water pollution & 74% less air pollution than making virgin paper.

A bin for aluminum is located in the break room. Please rinse cans before picthing.

Aluminium is the 3rd most abundant element in the earth's crust & is the earth's second most used metal.

Recycling scrap aluminum requires only 5% of the energy used to make new aluminium.
