

Mid-Level Remediation Engineer – Tampa, Florida

HSW Engineering seeks an experienced Remediation Engineer for our Tampa office, who is knowledgeable in strategic planning, feasibility study, and environmental remediation experience under various regulatory programs (RCRA, CERCLA, petroleum, RBCA, and dry cleaning) and possesses excellent verbal and written communication skills. The successful candidate will report to a senior engineer and will be expected to work largely independently, while following HSW's quality and risk management policies. This is a mid-level level position with significant growth and career advancement opportunity.

Responsibilities:

- Serve as a Project Manager in support of project implementation (scope, schedule, budget management) and remedy evaluation, selection, design, permitting, implementation, and reporting.
- Performs remediation design using various soil and groundwater remediation technologies/strategies to clean up contaminated sites in accordance with the applicable regulatory criteria.
- Duties may include field investigation activities, developing and coordinating field pilot tests to evaluate different soil and groundwater remedial alternatives, remedial option cost estimating, management and disposal of wastes (including hazardous waste) in accordance with the applicable federal, state, and local regulations, developing contract and bid documents for selected remediation alternatives.
- Helps to expand our reputation via publishing, presentations, and visibility at prominent industry conferences.

Qualifications:

- Bachelor's degree required; Engineering (chemical, environmental, civil, or similar). MS degree is preferred.
- Professional Registrations/Certifications required; Professional Engineer (PE)
- Excellent professional skills, with specific emphasis in design, installation, and optimization of soil and groundwater remediation systems.
- At least five (5) years of directly relevant work experience.
- Demonstrated verbal and technical writing skills and problem-solving abilities.
- Demonstrated experience with complex document composition.

HSW is an integrated earth science and engineering firm providing proactive, innovative, and cost-effective solutions for Site Investigation & Remediation, Environmental, Water Resources, Military Design and Construction, and Civil/Land Development projects. We offer a small, responsive office atmosphere where you will be a key player in supporting our Fortune 500 and governmental clients. E/O/E.

Job Type: Full-time
